Prof. Joshua Lederberg,  
Dept. of Genetics,  
Stanford University,  
Medical Center,  
Palo Alto,  
California.

Dear Professor Lederberg:

Thank you very much for your letter of 24th Nov. and the  
kind words about my book.

I was very interested to read your manuscript. I think the  
way in which you arrange the hexagons is very simple. It has  
the big advantage that no numbering system is needed to  
describe the fusion of the ring.

Having completed my book I do not know of any advice  
I could give you about its practical use. As you know  
editors of journals are not very accessible in this matter.  
I know this from my own experience.

Kind regards

Yours sincerely

DENDRAL

E. Clar
